Education

Bachelor of Science, Computer Science (Cybersecurity Focus), Expected 2026
Oregon State University
Corvallis, OR

- Relevant Coursework: Secure Programming, Network Security, Operating Systems, Computer Networks
- Conducted network monitoring and incident response in real time using live network traffic
- Analyzed SIEM logs using Elasticsearch and Kibana to detect abnormal traffic patterns
- Configured Linux and Windows systems for secure network communication
- Applied best practices in malware detection, log analysis, and system hardening

Experience

SOC Analyst — Oregon State University

Corvallis, OR | 2025 – 2026

- Worked in a team to monitor and act on thousands of alerts for clients
- Constructed a penetration testing box and configured it for easy installation
- Updated the Zeek scripting for our Kibana alerts to reduce alert fatigue

Research Assistant — Oregon Research Institute (ORI)

Eugene, OR | 2024 – 2025

- Collected and analyzed technical research data for projects
- Developed Power Automate scripts to automate email distribution
- Fixed technical issues for instructors regularly
- Worked with and monitored large groups of participants on Zoom

IT Intern — Oregon Research Institute (ORI)

Eugene, OR | 2023 – 2024

- Performed routine system and network maintenance
- Assisted with tech storage room organization, equipment configuration, imaging, and user access management
- Used workplace tools like Microsoft Office, the help ticket system, and hard drive backup hardware and programs
- Troubleshoot connectivity and software issues across multiple departments
- Supported system upgrades and hardware installations
- Set up and configured networking devices like routers, switches, firewalls, and network monitoring tools
- Received, managed, and completed many service tickets daily
